

Think beyond limits

PRODUCT INFO
DESSO AMBITION

More people benefit when maximum use is made of the available space. And for sporting versatility, artificial grass is difficult to beat. Desso Ambition is an artificial grass system that can host a variety of sports and provides consistently excellent play characteristics for each different activity. Intensive testing of Desso Ambition's grip, ball control and shock absorption characteristics have shown that it is especially suitable for football, hockey, rugby, etc.

Weather-independent

Moreover, Desso Ambition eliminates the effect of various climatic conditions, with its superb draining properties, lower heat generation and playability even during freezing weather and snow.

A profit-maximising investment

Desso Ambition is a sound money-earning proposition for operators and groundsmen. It ensures that the facility is fully utilised, maximising revenue for the operator. It also simplifies maintenance and reduces costs.

In addition, there are environmental benefits: lower heat generation eliminates the need for watering, the foundation layer lasts twice as long as the artificial grass and so can be re-used, and the system can easily be recycled.

Desso Ambition

Optimum playing characteristics for different sports

- scientifically proven sliding characteristics
- optimum grip and traction
- high shock absorption guaranteed

Consistently high performance under all weather conditions

- reduced heat generation in the field
- can also be used in freezing weather and snow
- optimal drainage

Attractive look and feel

- new top layer configuration
- natural effect thanks to special manufacturing techniques
- combination with natural-looking infill

Safe for players as well as the environment

- comfortable for the player and the groundsman: no bouncy rubber
- no compaction of the field
- can be played on with standard football shoes with plastic studs or blades
- also suitable for indoor halls
- recyclable

- DESSO Artificial grass**
- lower surface temperature in summer
 - natural appearance thanks to special ZigZag production method
 - scientifically proven sliding characteristics

- ENVIROFILL Infill**
- fill with unique roundness (+90%)
 - ecologically responsible / recyclable
 - no rubber-splash/smell

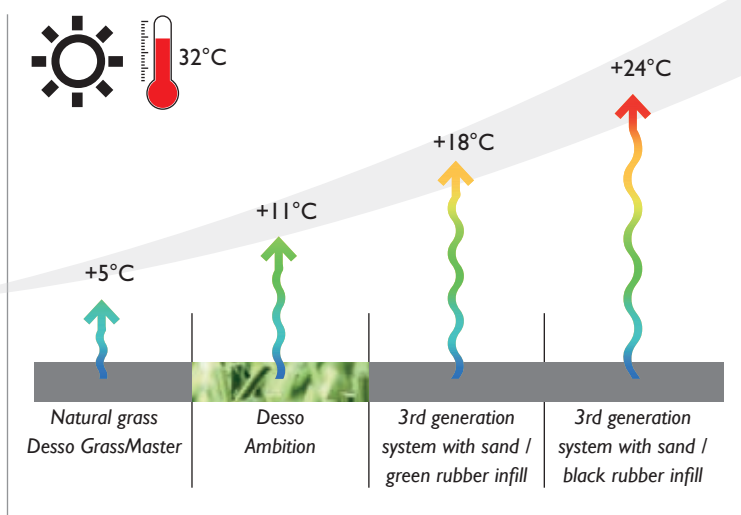

- PROPLAY Shockpad**
- high-performance shock absorption
 - accelerated vertical and horizontal drainage
 - very durable

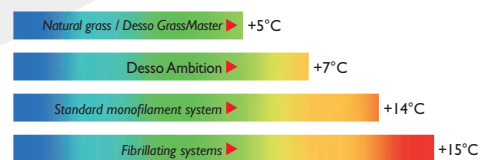

- Total system**
- optimal drainage: no top-layer saturation
 - anti-compaction properties
 - easier maintenance
 - extremely durable, non fibrillating yarn

Heat build-up of pitch surface

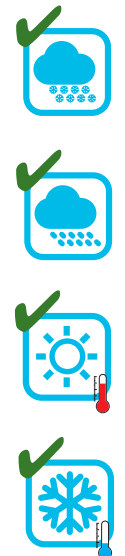

Simulation in lab

Friction on skin during sliding

Weather independent playing

optimal playing characteristics | safe for players and the environment | high performance under all weather conditions
