Club: Braxgata Hockeyclub  
Country: Belgium  
Product: Desso Sportilux

***“Desso Sports has an international reputation as the reference in hockey artificial turf fields.”***

**Philip Dubois, Chairman of Braxgata hockeyclub**

The Belgian Hockey association decided to establish its national hockey centre at the fields of Braxgata Hockeyclub in Boom. All the hockey fields were supplied by Desso Sports Systems and installed by Desso's Belgian partner Sportscape nv.

Erik Gysels, chairman and responsible for the infrastructure at Braxgata, explains: "We already have 3 artificial turf hockey fields but because of the decision of the KBHB we have decided to install a fourth field. It became a second water-based field. Top players naturally put high demands on the accommodation. As regards the field, you automatically end up with Desso Sports. Our other 3 fields (one water-based field, one semi-water-based and one sanded) are also from Desso and our players are extremely enthusiastic about it."

Colleague-chairman Philip Dubois adds: "Desso Sports has an international reputation as the reference in hockey artificial turf fields. The technological lead and the know-how as regards the installation of artificial turf water-based fields means that we have brought in the absolute top quality. Our club members greatly appreciate that. The added value of our Desso water-based fields makes it possible for us also to attract renowned top teams and federations from abroad."

National hockeycenter Belgium is an impressive artificial turf complex.

Warm-up at the hockey artificial turf from Desso Sports Systems.
