*“Integrated Athletic Development (IAD) is the destination of aspiring and elite athletes seeking the next level of performance. So, when we selected an indoor turf system, high performance Envirofill was our infill of choice. We needed a system that was fast, stable and of the highest level. Our athletes training with us here at IAD expect the best. In addition to being high performing, Envirofill is odor and dust free and safe for our indoor application. We would highly recommend USGreentech and their solutions to others.” – Del Castillo, Owner*
